**rapid.**

# ASSEMBLY INSTRUCTIONS

# 1

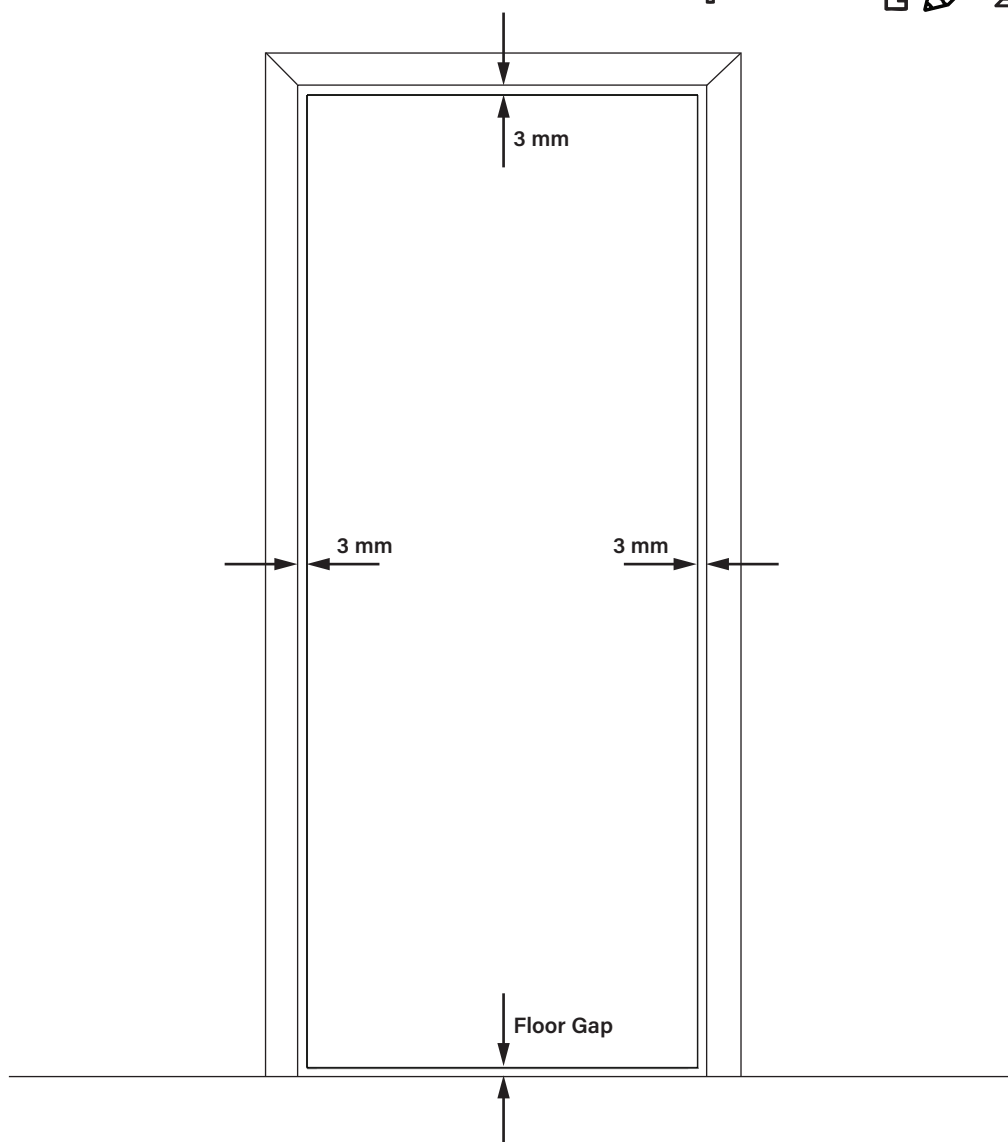

\* Measure door opening before installing.

**rapid.**

## ASSEMBLY INSTRUCTIONS

# 2

**i** DOOR WIDTH = opening width - 6 mm (allowing 3mm clearance on each side)  
DOOR HEIGHT = opening height - 3 mm (top clearance) - floor gap (varies by floor type)

**i** Double-check door orientation before trimming. The bottom corner with 'LOCK' stamp indicates side with the lockbox.

Maximum 10 mm can be trimmed from any edge of the door. Trim evenly on both sides.

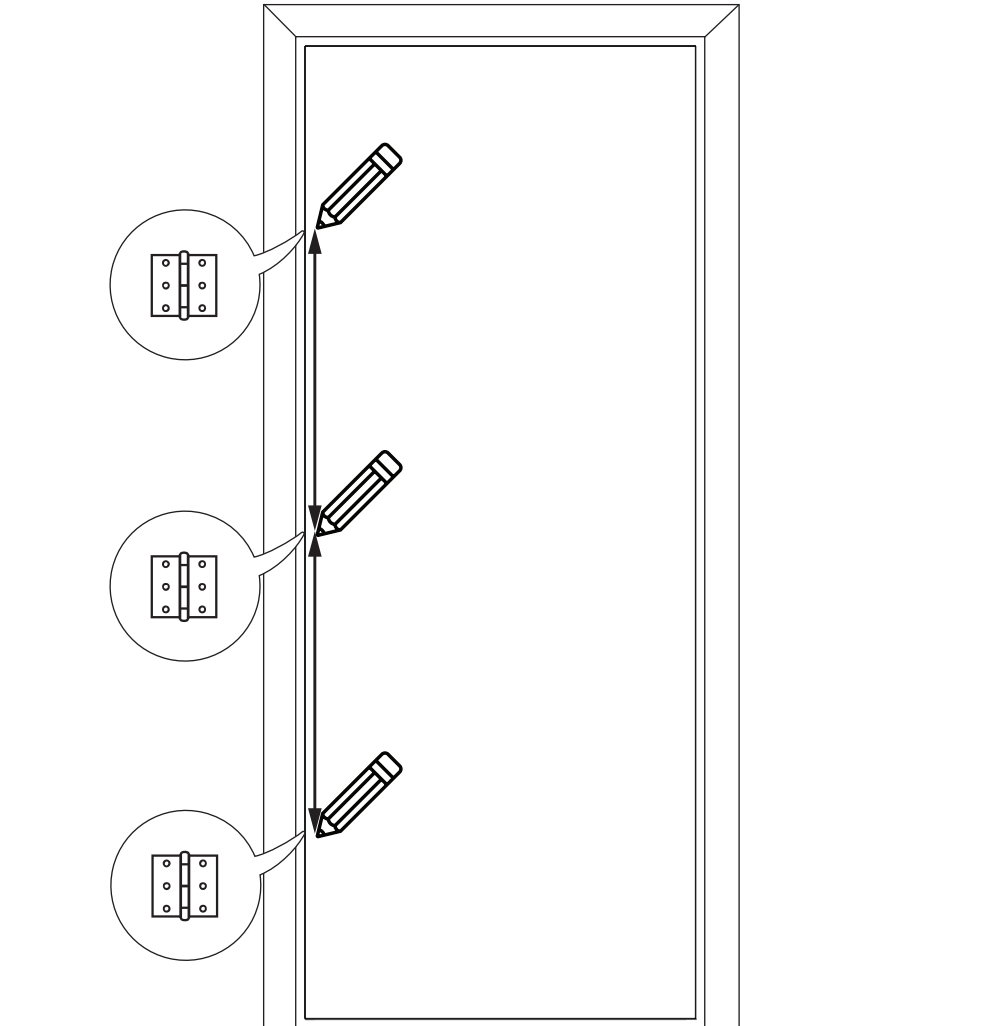

\* Recommended clearance: 3 mm between door and frame.

\* Refer to painting instructions on our website for sealing doors.

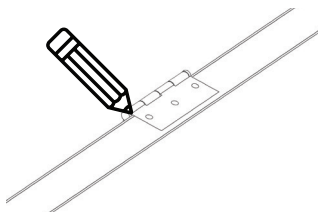

# rapid.

## ASSEMBLY INSTRUCTIONS

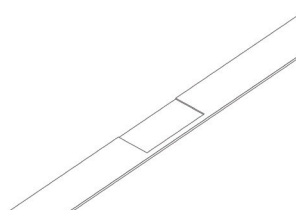

# 3

**rapid.**

## IMPORTANT USAGE NOTICE

Door may be heavier than some timber doors, it is important to lift safely to avoid any damage to yourself or door.

Can be used as internal door in wet areas. Please refer to QR code for correct prepping and painting of doors depending on placement.

Hinges can be placed in desired locations, recommended to chisel or route out rebate carefully.

Use 50-60mm length timber screws to hang hinges to fit securely into the door.

Trim doors no more than 10 mm on any side.

Make sure to inspect door prior to installation for the correct size and any defects.

Warranty may be voided if proper prep and care is not taken. Please refer to our warranty.

For more information on compliance with bushfire building requirements, please refer to QR code.

Always wear mask and safety goggles when trimming, chiselling, routing, or drilling the door to avoid inhaling dust and to protect eyes.
